Summary Session - **HOW DO YOU SPELL CHANGE?**

Dr Eugene Young

It is necessary to review how we do things at Provincial and County level and to assess how effective and efficient we are. If changes are required then it is necessary to make the leap.

CHANGE Make the Leap!

If we do not at least consider making changes for the better then we will not have at least explored what the potential is if this change were to be implemented

**The GOLDFISH didn't know
about water
until he jumped out of
the tank**

As coaches we are being challenged to think outside the box. In addition as administrators we should again be challenged to think outside the tank.

THINK OUTSIDE THE TANK

Treat each obstacle as a challenge that has to be overcome.

SUCCESS?
OBSTACLES MAKE IT DIFFICULT?

In Ulster the main enemy to success is complacency

COMPLACENCY

In this centenary year we can review 100 years of change. The next 100 years will see more change. We can move with it or show lack of progress over the next ten years.

CHANGE IS INEVITABLE **Progress is Optional**

We all fear change because it brings with it uncertainty. Where there is uncertainty we stick to the status quo, or what we know. You the people in this room are the *Change Agents* who can influence change.

HOW DO WE SPELL CHANGE?

Go back to the Counties and review and look to come up to speed with the issues addressed in the workshops. Every little counts as we move forward and inch at a time

AN INCH AT A TIME AND THEN ALL THOSE INCHES MAKE A MILE

At County level the micro level build capacity and enhance knowledge base, support coaches and work together to bring GAA in your county forward.

Micro Level

- Build Capacity
- Enhance coaching knowledge
- Provide opportunities
- Support Coaches
- Avoid burnout
- Work together
- Work Smarter

Review the Seven S's as outlined by Mark and identify where you are strong and not so strong. Build on the strengths but also tackle the weaknesses, build the weakness into a strength.

SEVEN S

- Strategy
- Systems
- Structure
- Skills
- Style
- Shared Values
- Staff

As High Performance Director my role is to work with all counties and I have been trying to do this. Making changes with the coaches about coaching has been much easier than with Administrators.

"One can feel that one is making a difference at a micro level. The problem of macro change and influence is the greatest challenge and it is certainly the most difficult.

To usefully effect such change, the media (County Boards) and politicians (County Officials) must be morally and ethically committed to seeking the truth (moving forward), even if it isn't good for the ratings. This unfortunately may be a bit of a dream

•Ric Charlesworth 2001, p54 - The Coach Managing for Success

It is time to move forward in Ulster together. To achieve success the Administrators need to support quality coaching and the coaches and administrators must have the vision to achieve success.

QUALITY REQUIRES SUPPORT AND VISION
